<html>

I'm sure there are very few ham=
s

and electronic hobbyists within 300 miles of Southern New Hampshire who have never been to the Hosstraders flea market at least once in their lives. Some of us have been going since the mid 1970s and I'm sure that the majority of attendees will say unequivocally that it is the best tailgating swap fest there is - bar none! The original "Hosstraders; Joe Demaso, K1RQG, Bob Tiffany W1GWU and Norm Blake WA1IVB have been running this landmark event every May for over 25 years (and since 1984, in October as well). By their own calculations they have raised over one million dollars to benefit the Shriners Hospitals for sick and injured children in Boston, Springfield and Montreal. Truly an outstanding accomplishment.

 There are many of us who have seen Hosstraders grow to a small tailgate flea market in a Seabrook NH parking lot to the magnificent Deerfield Fairgrounds (with an unforgettable side trip to Kingston NH in 1986), to the Rochester Fairgrounds aka "Rainchester" 1993-1999, and most recently in 2000 to the beautiful Hopkinton State Fairgrounds just a short ride up I-89 from Concord NH. The Hosstraders is more than a flea market - it is a community; a family if you will, with a weekly

equipment swap net on 75 meters in addition to the semi-annual get-togethers.

We all have tons of personal memories from many years of going to Hosstraders and loads of great stuff in our ham shacks, work benches or computer rooms to show for it. We've had a whole lot of lot of fun in the process and Hosstraders has become a very important part of our lives - a cultural event we can look forward to through the long hard cold New England winter. It has been a true rite of spring every year and even now that the Fall 2002 Hosstraders is only a day in the past as I write this we are all looking forward to the Spring 2003 event.

But will there be an event next spring or for that matter ever again? This remains to be seen. It has been the Hosstraders custom to print the next years dates on the tickets every year but if you were there last October 4th or 5th and looked at yours you may have wondered why there were no 2003 dates on it. Here's why.

There has not been a contract signed with the Fair Committee for any future events because last May several unknown persons stole three 25 kV power utility step-down transformers, commonly called "Pole Pigs", from the fairgrounds during the Hosstraders weekend. For those of you unfamiliar with these things, pole pigs are very large and heavy. Two guys in a Dodge Neon couldn't have done this. It would take at least three strong people with a big pick-em-up truck to haul them away. The only use these things have to hams is to reverse connect them and use them for a (very) high power transmitter or amplifier. They have little scrap value and even less resale value because they are all numbered and no power company would touch them.

The three "Hosstraders" announced this news to the assembled crowd at the one o'clock prize drawing and made an appeal for anyone with knowledge or any information about this theft to step forward and help get them back. As it stands there will be no questions asked the matter will be dropped if the transformers are returned. If you know anything about this you may contact any one of the Hosstraders or any of the undersigned and help us get these back to the Fairgrounds as soon as possible. Your identity will not be revealed to anyone else involved. The transformers may be dropped off at several locations and no one will see anything. That will be the end of it.

However if the stolen transformers are not recovered soon the investigation by the authorities will proceed. The owners intend to vigorously prosecute anyone found to be involved in the theft and it is a pretty sure bet that there will be jail time if they are convicted. The Hosstraders have offered to assume financial responsibility for the missing items and pay for them. This is a substantial amount - several thousand dollars that would otherwise go to the Shriners and their hospitals. The other consequence to us all is that there will be no future contracts signed for the Hopkinton Fairgrounds and it is a

sure bet that no other such facility will sign one either. This would mean the end of Hosstraders!

We are personally outraged by this theft and the prospect of not having the Hosstraders events to look forward to in the future. We want to help get this matter resolved to everyone's satisfaction as soon as possible so plans for May and October 2003 can proceed. We want to help Norm, Joe and Bob raise a second million for the hospitals. We want more Hosstraders, more stuff, more good times and more memories!

Of course we are hoping that someone will step forward and help get the transformers back and as mentioned we will act as intermediaries. We can guarantee your anonymity and assure you that no questions will be asked. For the rest of you please do not speculate or point fingers at anyone or any particular groups of hams. It will not solve anything and only serve to alienate and divide us at a time when we must all stand together to save our Hosstraders. It has been suggested that publicizing this unfortunate incident will reflect poorly on amateur radio but we do not feel that it is so. We should not nor cannot assume legal responsibility for the acts of a few criminal individuals. Remember, the Hosstraders is a public event and anyone with the price of admission is eligible to enter. There is no hard evidence that we know of as to exactly when these items disappeared or that the persons who stole these items were attending the flea market or are licensed hams, although practically speaking, who else would have any use for them?

Nonetheless, we need to take the practical responsibility here and see to it that this incident is quickly resolved to the satisfaction of the Fair Committee and the Hosstraders organizers to ensure that the event does not die due to the criminal and irresponsible acts of a small group of individuals. It is conceivable that in the five months that has elapsed these transformers have been disassembled or even disposed of and are simply not available for return. If for whatever reason they do not surface within a reasonable time, say the end of October, we would like to recommend the following course of action Suitable and equivalent replacements be located, purchased and offered to the Fairgrounds Committee requesting them to sign the 2003 contract thus allowing us to continue holding the event at Hopkinton. We figure that three new custom-made replacements can be purchased for about \$1,000.00 apiece from a manufacturer in the Midwest. Then next May and October if necessary, have a "drop bucket" for people to contribute to the cost of purchasing the replacements. As an alternative a surcharge be added to the gate fees until the cost has been recovered with any overage going to the Shriners. Knowing the Hosstraders community as we do we have no doubt that this sum will be quickly and cheerfully raised.

It would gall us to have to pay for what the thieves stole last May but we all must collectively bear the financial responsibility and not permit the Shriners Hospitals to lose out which they would in the final

analysis. A million bucks buys a lot of equipment which can save lives and alleviate suffering of sick and injured children and we'd like to see this outstanding act of benevolence on the part of Norm, Joe and Bob and everyone else involved in this wonderful happening that has become a very important part of our lives to continue to the two or even three million dollar level. We just cannot and will not allow three or four common thieves to take this away from us.

Signed

If it has the noise elimination circuitry it's a "C" or earlier model. Also, check whether or not the Fast Tune knob includes a built in slip clutch. "C" and earlier models did not.

The BC-342 would have been used in fixed station installations or where 115 vac would otherwise have been available for the power supply (SCR-197, 299, 399 & 499 for ex.). The 12 vdc BC-312 would have been more commonly used with the BC-191 xmitters (SCR-177B, 188A, 193, and 210 configurations for ex.).

The BC-342 and 312 receivers are virtually identical except for the power supplies (RA-20 in the 342 and DM-21 in the 312). See ER #95, March 1997 for more.

Today I recieved an inquirey about radio tubes. Thinking this was legimate I answered the email and next I knew the answer bombed. Re reading the inquiry I found there was an attachment that I hadn't seen. I opened the download and discovered Porn. These bastards will do anything to get your attention.

Hi Gang,
I'm restoring a Lysco 600 (6AG7 osc, 6AG7 buffer/mult, 807 final) and need to replace the tank coil, which is about a 3 inch length of 1 inch OD, 9 turns/inch miniductor. I've got a pretty good collection of minductor stock (B&W and Airdux) in nearly every size but the one I need. Anybody got any I could buy or swap?
Tnx,
Jim Garland W8ZR

BAers,

I just bought a Philco radio that I need some help with. Any information will be appreciated. Following is the description:

Philco-Tropic Radio Model 40-748

7 tube battery radio
2 ea 49 and 6S7G tubes
1 ea 6G6G, 6T7G, 6D8G

3 Bands covered
B'CAST .50-1.70
SW1 2.3-7.0
SW2 7.5-22

Heavy but pretty wood cabinet 20" W x 14 3/4" H x 10" D

Philco tag with model number says Philadelphia Storage Battery Company
Some info in English and French?

Another tag says "Built to receive television sound, the Wireless Way when used with Philco Television Picture Receiver, without wires, plug in, or connections of any kind."

It come in a very heavy built wood box with nice dove tail joints and heavy padding. Looks like mahogany wood.

I am looking to trade for more coils for my National SW-3 receiver. I have for trade a set of 40 meter bandspread coils. Looking for either a set of 160 meter or 10 meter bandspread coils. Also have an extra coil set #63, 4.2-8 Mhz (also known as the "white" set). Looking for coil sets 66, 67, 68, 70, 71, or 72. All coils in excellent condition.

Subject: Collins 30J
Mime-Version: 1.0
Content-Type: text/plain; charset="us-ascii"

I can't beleive my good fortune - I'm now the proud owner of a Collins 30J-18! 250 watts from a pair of 813s modulated by a pair of C-120s (look a bit like 211s). Missing a few coils and a loading capacitor, power supply a bit rusty, but looks restorable. So my search for "heavy iron" (well, almost heavy) is over.

Anyone have experience with these beastsies? I'd be interseted in hints, kinks and comments.

Looks like I've found a suitable companion for my NC-101X.

Subject: Removing the base from an 841

Date: Wed, 9 Oct 2002 20:52:52 -0500

MIME-Version: 1.0

Content-Type: text/plain;
charset="iso-8859-1"

Content-Transfer-Encoding: 7bit

Group,

I want to thank everyone who sent their comments and suggestions. The consensus was as follows:

1. While there is a chance that the base could be removed by a solvent, it is a slim one indeed.
2. The base can be removed by using either a Dremel tool or a hacksaw. A Dremel tool is probably too risky as a slip is likely to occur, damaging the tube. A hacksaw is the best bet.
3. Why mess up a perfectly good 841!

After consideration, I guess that I'll pass on the modification, although it was a common one back in the '30's. Anyone got some 10's out there that they are willing to sell.

Subject: Twinax?
Mime-Version: 1.0
Content-Type: text/plain; charset="us-ascii"

I'm looking for a short twinax cable and/or the associated connectors (PL259 type but with two inner conductors) to connect a Lettine 240 VFO oscillator box to it's separate tuning condenser box (an odd, but perhaps effective arrangement!)

Any pointers appreciated! I remember a length of this being on a Daymark reeled component handler used in connecting it's Kelvin contactor to the Teradyne component tester I once used (early 80s), but I think thats the only time I've ever seen the twinax configuration.

Thanks!
John wb5oau

Bosun Supplies (bosunsupplies.com) has some very good prices on stainless steel rack hardware. As I remember the standard rack is 10-32 thread.

They have:

10-32 x 1/2" oval head phillips for \$4.40/hundred
10-32 x 3/4" " \$6.81/hundred

#10 finish washers (stainless) \$2.10/hundred

They've got all manner of nautical goodies if you sail too. Shipping is a flat rate, and seems reasonable (particularly if you factor in what Lowes or Home Despot charges for a little bag with 4 screws in it!

Now, if I could find the nylon inserts that fit inside the finish washers I'd be all set! (Lowes actually USED to carry those, but I havent found any since I rebuilt my Globe King 500C a year or so ago. Has anyone got a pointer on those?

73 and TGIF!

Group,

Does anyone out there have a terminal diagram and ratings for a Chicago Standard PSR-300 transformer.

73,

Paul, W9MEH

Subject: Hammarlund Historian web site update
Date: Sat, 12 Oct 2002 21:28:30 -0400

Hi everyone,

The Hammarlund Historian web site has been recently updated. Les Locklear has written a history of the Hammarlund Manufacturing Co. and it has been added in the "H-Files" section. It may be accessed directly at: http://www.hammarlund.info/info/company_history/co_history.pdf

George Maier, K1GXT, has been kind enough to send the HC-10 & HQ-105TR data sheets, as well as a great 4 page letter on operation of the HC-10 written by Frank Lester, W2AMJ, the Commercial Products Manager for Hammarlund. They are also in the "H-Files" section: <http://www.hammarlund.info/info.html>

These latter files are both in Acrobat .pdf form, with all pages in one file, as well as .jpg or .gif files of the individual pages. We'd be interested in your comments on which form is preferred. All the other items in the H-Files are in individual pages.

73,

Al, W8UT

New Bern, NC

[Resend of Message]

Hello Group,

We are having a sale.

As one of the last events to take place at HMCS HAIDA

while she is still
in Toronto, Friends of HMCS HAIDA is hosting a
sale of surplus items from the ship that have
accumulated over time but
bear no relevance to the ship's history.

The sale will be held Saturday, October 19th
8am-4pm on the jetty.
For more details, please click on the link below.

<http://www3.sympatico.ca/hrc/haida/jettysale.htm>

All items are for local sale and pickup only.

Shipping extra except as noted. All electronic items untested and as is.

Ameco LN-2 low-pass filter, SO-239 connectors, nice condition, \$5.

Sony ECM-170 electret mike, lavalier type, appearance VG+ with a few very light scrapes. Not an E-V 664, but a big cut above mikes furnished with cheap tape recorders. Phone plug connector. \$20

Rider Sound-n-Sight code course on records. Advanced (9-20 WPM). Three LPs and manual, in original box. Very clean, looks like it was never used. Box is worn but records are in original jackets with cardboard separators between each record. I used one of these courses to learn CW in the '50s. \$15

Crystals:

CR-23/U holders: 52.85000 mc, 50.27000 mc, 34.9000 mc, 10012.5 kc.

CR-1A holder: 8090 kc

FT-243 holders: 7733.3 kc., 8067 kc, 8358 kc, (2) 8323.333 kc

\$18 for all 10, shipping included.

Cornell-Dubilier synchro capacitor, MK.1 Mod. 3 Type 3C, 10-10-10 mfd. 90V, delta connected, 1944, screw terminals. \$5

Potted transformer, unused, audio output? Galvin 25B61185 B (last character may be an 8, hard to tell). Twelve solder lugs in groups of 5 and 7. Info on attached paper sticker: stock no. N-17T, inventory no. 78528-2001, Dec. 1952. Mounts on four threaded studs. 3-5/8 inches high x 3-1/4 inches wide x 3 inches deep.

Sylvania GB 13D lamp, NOS. \$5

Instruction book for AN/FRC-7A and AN/FRC/17A, VG-E condition, covers and edges slightly faded and marked by owner in several places. \$8 includes postage

1965 Allied catalog. Worn but intact. 472 pages of nostalgia. \$13 includes postage.

Original Heathkit manual for SB-600 communications speaker, ex. condition, \$8 includes postage.

Original Heathkit manual for IM-17 utility voltmeter, ex. condition, about half of the steps are pencil-checked. \$12 includes postage.

Original Knight-Kit manual for X-10 crystal calibrator, very good condition, \$6 includes postage.

Original CM-108 shop manual for Zenith color TV models using 25NC37 and 25NC38 chassis. Huge! More than 60 pages, with five foldouts. \$8 includes postage.

ARRL Radio Amateur's License Manual, 1959 (fair/good), 1962, (good), 1963

(good), 1973 (good), 1979 (very good), 1981 (very good). \$5 each includes postage; all six for \$25 including postage.

General Class Amateur Licence Handbook, Howard Sams & Co., Howard S. Pyle W7OE, 1965. Good condition--cover is creased but book is entirely intact. \$8 includes postage.

Understanding and Using Your Oscilloscope, Allied, William Stocklin editor, 1971, 128 pages. Excellent condition. \$10 includes postage.

Picture Guide to TV Tube Replacement, Editors & Engineers, Robert Middleton, 1965, 96 pages, first edition. Photos show problem symptoms with explanation of the problem and the tube that might be causing it. \$10 includes postage.

The TV Telefixit Book, Coleman Publications, John Kenneally, 1951, 64 pages. Assumes little technical knowledge but lots of motivation to get the TV working again, which in '51 certainly would've been the case. \$6 includes postage.

Catalogs:

Kreco Antennas (Herb Kreckman Co., Cresco, Pa.), cat. no. 6970--VHF/UHF omni verticals, issued Jan. 1, 1969. Two copies, one excellent, other very good. \$3 each includes postage.

Mosley 1968 ham antenna catalog, with price sheet. Three copies. All very good to excellent. \$6 each includes postage.

Hy-Gain 1967 antenna catalog, excellent. \$6 includes postage.

73, Avery W3AVE in Potomac, Md.
